

MANAGED SOC - MANAGED SIEM / MANAGED XDR

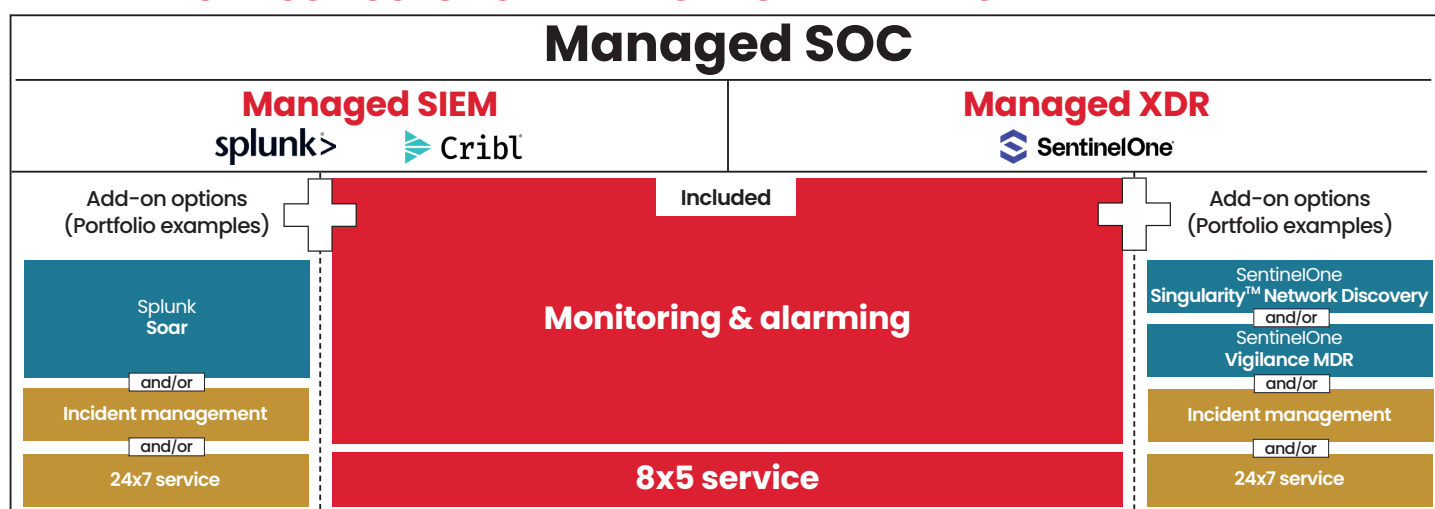

CUSTOMISED SECURITY AND PROTECTION FOR YOUR IT INFRASTRUCTURE

With advancing digitalisation, hybrid working, and a growing number of end devices across various systems and in the cloud, businesses increasingly need robust security solutions to protect sensitive data and ensure smooth operations. More companies are seeking security strategies that encompass and devices, firewalls, networks, cloud, and server levels. Our experts can help you find a tailored solution to meet your specific needs.

CHALLENGES

- Increasing demands on IT security due to regulatory innovations such as NIS2, DORA and the TSA
- Requirement to centrally record threats at all levels and react in real time before incidents occurs
- Lack of resources and training opportunities in your internal cybersecurity team
- Uncertainty over which safety and protection concept will meet current and future requirements

THE MANAGED SOC SOLUTION: MANAGED SIEM / MANAGED XDR

YOUR ADVANTAGES

- **Customised solution:** We tailor our offer to your individual IT protection needs, providing the ideal Security Information and Event Management (SIEM) solution for almost any budget.
- **Expertise:** Our team consists of certified cyber security experts with a proven track record of protecting organisations across all industries.
- **State-of-the-art technology:** We use the latest tools and technologies for Security Information and Event Management (SIEM) and Extended Detection and Response (XDR), which allow you to centralise threats at all levels and react in real time before damage occurs.
- **Cost efficiency:** An in-house IT security team can be expensive, and experts are hard to find. Our service gives you access to first-class expert knowledge and optimises your security budget.
- **Focus on your core business:** Leave your IT security to us so that you can concentrate on the success of your company – 365 days a year, around the clock.
